DRAKKAR

Avant la 1ère Guerre Mondiale déjà, les rues de Paris, Londres ou New York étaient pavées de bois de bout du fait de sa résistance exceptionnelle à l'usure, à l'abrasion et au poinçonnement. Ses qualités incomparables lui ont permis de résister à l'épreuve du temps.

LA NAISSANCE D'UNE PASSION...

A la genèse de DRAKKAR, nous avons exploré l'improbable bois de bout. Nous avons mis au point ce concept révolutionnaire des Pavés de Paris, qui permet enfin d'offrir le décor et la robustesse du bois de bout au monde de la décoration.

Il nous a fallu plonger dans les logiques ancestrales et mettre au point de nouveaux savoir-faire pour appréhender les fluctuations dimensionnelles du bois de bout, et ainsi offrir le fleuron des revêtements de sol, alliant la chaleur du bois et la dureté de la pierre.

EXTERIOR WOOD BLOCKS

TECHNICAL DATA

ROBINIA

MEX PINE

DESCRIPTION:

Robinia is the only temperate hardwood introduced which naturally covers the use class 4.

Mex pine is transformed by an acetylation process. This makes the wood species more resistant and durable. Thus, several advantages result from it, namely:

Lifespan :

50 years in exterior not in contact with water

25 years in ground or fresh contact water

Dimensional stability :

better for tangential and radial stability

Green friendly:

wood is 100% recyclable material
